Bureau Executive Summary

Here is the executive summary:

The customer's tradeline portfolio consists of N=27 total tradelines (M live=22, P closed=5). The portfolio features a mix of loan products, with Credit Card being the dominant product type. Total sanctioned exposure stands at INR 72,48,130, while total outstanding is INR 8,22,679. Unsecured sanction amount and outstanding are identical to total outstanding, indicating no separation between secured and unsecured loans. The credit card utilization percentage is 9.0%, which is elevated. There are no defaulted loan types present in the data.

The customer's behavioral features indicate a relatively clean repayment profile, with zero DPD across all products and windows, no missed payments. The trade-to-enquiry ratio is 40.00% for unsecured trades, indicating moderate enquiry activity. Loan acquisition velocity is also notable, with an average interpurchase time of 3.45 months. However, the FOIR (total) stands at 68.5%, indicating over-leveraging, while the FOIR (unsecured only) is 60.8%. The sanctioned exposure trend has decreased by 4% over the last 12 months, with a stable trend over the last 6 months.

Combined Financial & Bureau Report

Key Findings & Inferences

Portfolio

Unsecured sanction is 100% of total (INR 72,48,130 of INR 72,48,130)

-> Heavily skewed towards unsecured lending; higher risk in absence of collateral

Delinquency

No delinquency detected across the portfolio

-> Clean delinquency record is a positive indicator for repayment discipline

Utilization

Credit card utilization at 9% [Opened: Aug 2018 - Nov 2025 | Last Closed: Nov 2025]

-> Healthy utilization indicates disciplined credit card usage

DPD & Delinquency

Zero DPD across all products in recent 6-9 month windows

-> Clean recent payment record demonstrates consistent repayment discipline

Payment Behavior

No missed payments in last 18 months

-> Perfect payment track record over 18 months is a strong positive

Enquiry Behavior

0 unsecured enquiries in last 12 months

-> Minimal enquiry activity indicates stable credit position

Combined Financial & Bureau Report

Banking / Transaction Report

Executive Summary

The customer's banking profile presents a stable financial picture. The average monthly cash flow indicates an inflow of INR 50,922 and outflow of INR 8,090, resulting in a net positive balance of INR 42,832. This is largely driven by the customer's salary income, which averages INR 51,020 per month from six transactions. The EMI commitments of INR 7,500 per payment, with two debit transactions, contribute to the overall cash flow. Notably, the banking FOIR ratio stands at 14.7%, indicating a comfortable level of debt servicing.

The customer's merchant behavior is characterized by regular interactions with BHOSALE RAJU TA, who receives four transactions worth INR 200 each. The most frequent merchant, BHOSALE RAJU TA, has been visited four times in the recent period. Additionally, the customer has established relationships with EMI EV and EMI VEHICLE, which receive debit transactions of INR 5,000 and INR 2,500, respectively. These merchants account for a significant proportion of the customer's spending, with Salary Oct 2025 accounts for 98% of credits and EMI EV accounts for 62% of debits.

The customer has experienced several transaction events in recent months. In Jun 2025, the customer received INR 72,000 salary and transferred INR 72,000 to their own account the next day. In Jul 2025, the customer made an EMI payment debit of INR 3,750 (MB:SENT MONEY TO OWN 2411726562/EMI VEHICLE). The customer has also received payments from emerging merchants such as REKHA KANSAL and SALIM AMIN ATTA in recent months.

Combined Financial & Bureau Report

Combined Executive Summary

The customer's income profile indicates an average monthly salary of INR 51,020 from six transactions, resulting in a net positive cash flow of INR 42,832. The credit portfolio consists of N=27 total tradelines (M live=22, P closed=5), with Credit Card being the dominant product type. Total sanctioned exposure stands at INR 72,48,130, while total outstanding is INR 8,22,679.

The customer's obligations and risk profile indicate a relatively stable financial picture, with a comfortable level of debt servicing indicated by the banking FOIR ratio standing at 14.7%. However, the bureau data reveals over-leveraging, with FOIR (total) standing at 68.5% and FOIR (unsecured only) at 60.8%. The credit card utilization percentage is 9.0%, which is elevated. A cautious creditworthiness assessment is warranted due to these factors.
